

Nervous System Regulation

Nervous system dysregulation occurs when your body becomes overwhelmed by stress or negative emotions. In the case of anger, this can result in getting stuck in the “fight” response. This can cause physical sensations like a racing heart, tense muscles, clenched fists or jaw, a red face, feeling hot, or shaking. On the other hand, dysregulation due to anger can also manifest as shutting down, closing off, or feeling numb. These signs show that your nervous system isn't balancing well between states of alertness and rest.

Regulating your nervous system means finding ways to help your body feel calm, safe, and grounded, even when something makes you angry. There are techniques that can help you shift out of states of fight or shutdown and move toward a feeling more stable and centered. By learning to regulate your nervous system, you can improve your ability to cope with life's challenges, experience more emotional balance, and feel more connected to yourself and others.

This worksheet will guide you in recognizing how anger shows up as a physical sensation. Understanding these sensations is the first step in managing anger more effectively. You'll learn to tune into your body's signals and practice techniques to help calm or soothe these responses, giving you tools to handle stress and emotional challenges in a healthier way.

Here's an example of how anger might be experienced in the body:

Nervous System Regulation

PART 1: Scan Your Body for Sensations

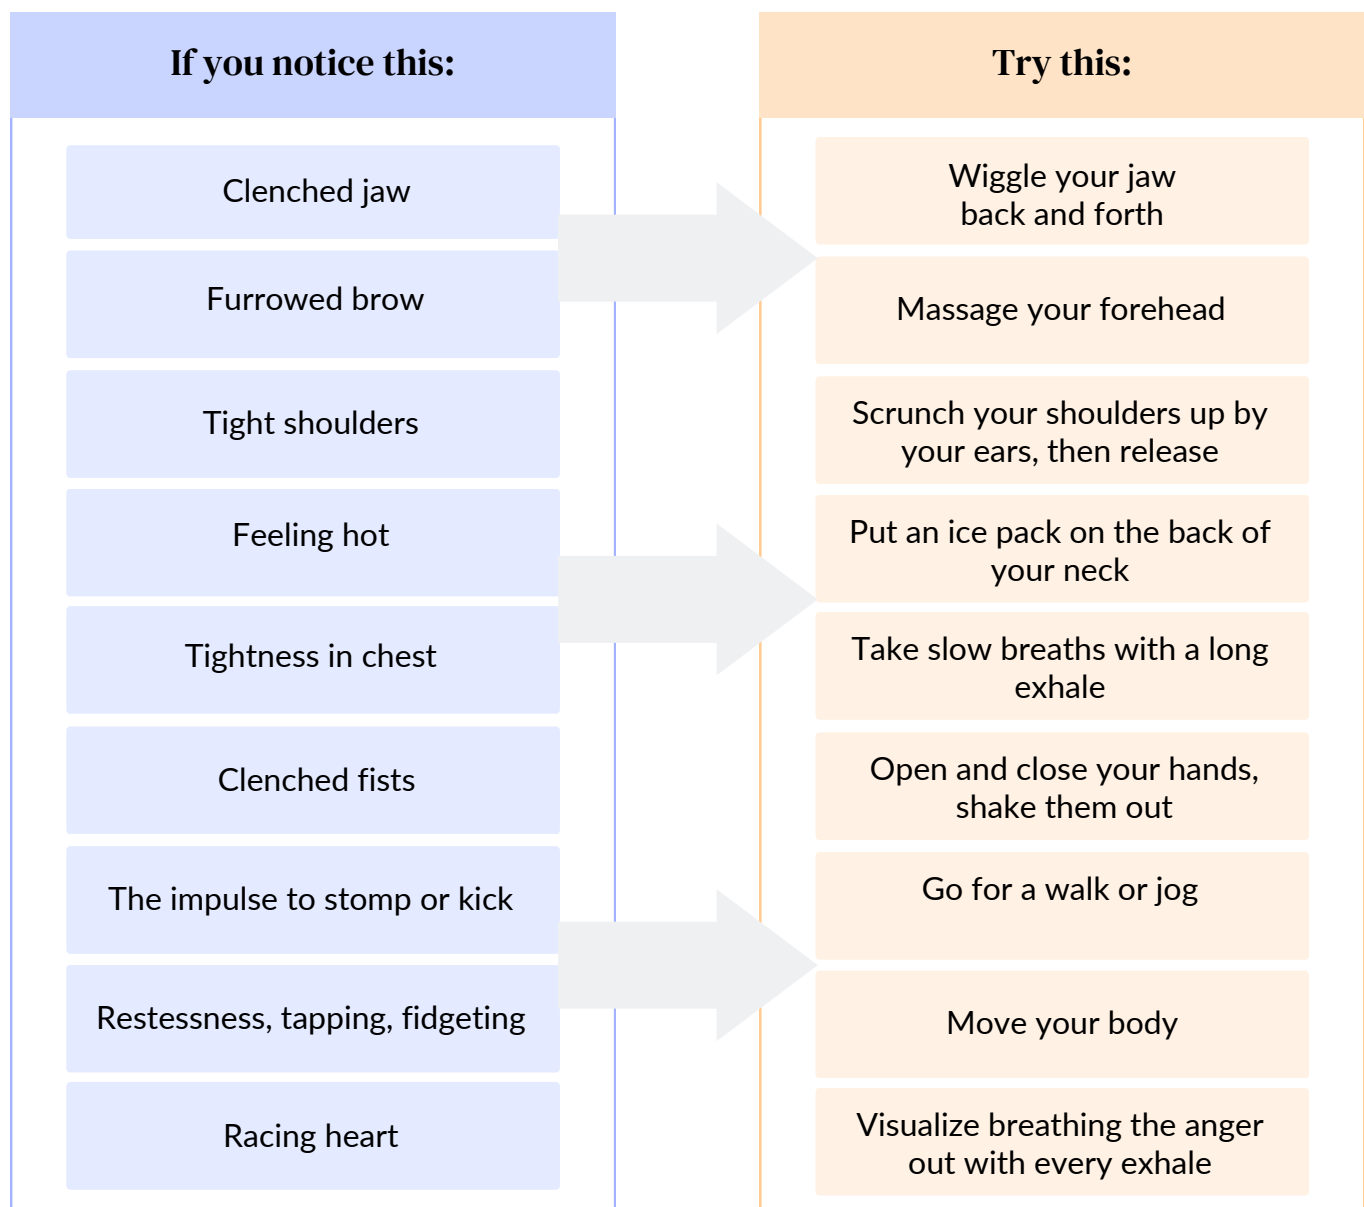

Starting with your feet and working your way up, notice any physical sensations. These can be positive, neutral, or uncomfortable. There is no wrong answer. Just notice what you notice and write it down. Here's an example of how emotions might be experienced in the body.

One way to regulate your nervous system is by addressing the physical sensations that come up when you are feeling strong emotions. This could include changing your temperature, relaxing a muscle, or doing something that feels soothing.

PART 2: Regulating the Nervous System

Now, what to do about it? When you're feeling a difficult emotion, first notice what it feels like in your body then try one of these techniques. Notice how you feel afterward.

Nervous System Regulation

Daily self-care for the nervous system is important for being able to cope with anger and other difficult emotions. This means engaging in activities that help you feel centered, grounded, present and calm on a daily basis, BEFORE anger kicks in. Stress, illness and even the pressures of everyday life can dysregulate the nervous system, and these activities can help you move through your emotions in a healthy way.

PART 3: Daily Nervous System Self-Care

Nurture your nervous system! Use this worksheet to help you rate how often you do these practices, then add this list to your daily self-care routine.

Ranking

- 1 I rarely engage in this, and it is not a regular part of my routine.
- 2 I occasionally engage in this, but it is not consistent.
- 3 I regularly engage in this, and it is a frequent part of my routine.
- ★ I want to do this more frequently.

<input type="checkbox"/>	<input type="checkbox"/>	Take a break from screens and any over-stimulating media
<input type="checkbox"/>	<input type="checkbox"/>	Listen to soothing music or sounds
<input type="checkbox"/>	<input type="checkbox"/>	Take a warm bath or shower
<input type="checkbox"/>	<input type="checkbox"/>	Do aromatherapy with essential oils or a favorite candle
<input type="checkbox"/>	<input type="checkbox"/>	Spend time outdoors in nature
<input type="checkbox"/>	<input type="checkbox"/>	Drink a cup of comforting tea or another soothing ritual before bed

Nervous System Regulation

Journaling can be a powerful tool for building new habits that support nervous system regulation. It allows you to explore which techniques or coping tools are most effective, so you can refine your routine.

PART 4: Daily Reflection

Reflect on how you feel each day as you practice these techniques. Track the techniques you are using, how effective they were, and any patterns of changes you have noticed. Create extra copies of this page for each day of the week.

Which techniques did you use today?

Which technique was the most effective?

Which techniques were not effective and need to be adjusted?
